

Welcome to

openSUSE®

Tumbleweed

COOL

- Fully automated testing of any kind of software
- Takes frequent screenshots and compares with desired result

• Easy web interface with clear status view

COOL++

- Tumbleweed offers a rolling release repository for openSUSE so you can escape the upgrade mill and enjoy smooth and stable progress.
- Always the latest software without the work that typically comes with a rolling-release distribution.
- Fall back anytime on the stable openSUSE release by removing the tumbleweed repository.
- openSUSE Tumbleweed is a project on the move. Testers are encouraged to join the mailing list and provide feedback. And contributors are always welcome.

Freedom & Choice

- openSUSE is all free and open source. But if you need it, flash and media support are available and easy to obtain.

COOL++

- The major free desktops GNOME, KDE, LXDE and XFCE are all fully supported and ship on a single DVD—so the choice is yours.
- Download openSUSE on download.opensuse.org.

openQA

COOL

- Fully automated testing of any kind of software
- Takes frequent screenshots and compares with desired result

• Easy web interface with clear status view

COOL++

- Test scripts are easy to write.
- Screenshots can be downloaded as videos.

✓ See it in action at openqa.opensuse.org.

COOL

- openSUSE is all free and open source. But if you need it, flash and media support are available and easy to obtain.

COOL++

- Hello! We're the international openSUSE Community—friendly, welcoming and active in creating the premier Linux for the future.
