

# what's COOL about openSUSE

## TUMBLEWEED

### COOL

Tumbleweed is an exciting new initiative from the openSUSE community.

Enjoy a rolling release edition of openSUSE 11.3 using the latest stable kernel series, xorg and drivers - continuously updated with the freshest stable Free Software packages as they enter the Factory development tree.

openSUSE

Forget the hassle of selecting multiple repositories on obs. Just add the magical tumbleweed repository with YaST or from the command line.

```
zypper ar --refresh http://download.opensuse.org/repositories/openSUSE:/Tumbleweed/standard/Tumbleweed
zypper dup -r tumbleweed
```

### COOL++

Tumbleweed allows experienced users to access the very latest software without frustrating breakages of untested Factory packages.

openSUSE Tumbleweed is a project on the move, testers are encouraged to join the mailing list and give feedback, and contributors are always welcome.
