DESKTOP CHEAT SHEET

Ten commands worth knowing.

`sudo zypper dup`
Update Tumbleweed or Slowroll to the latest snapshot.

`sudo zypper up`
Install the latest updates on Leap.

`zypper se <term>`
Search the repositories for a package.

`sudo zypper in <pkg>`
Install it, dependencies included.

`opi codecs`
Add full multimedia codec support.

`zypper info <pkg>`
Version, repo and dependencies at a glance.

`flatpak install flathub <app-id>`
Get sandboxed apps - the easy way on Kalpa.

`snapper list`
See every system snapshot taken before changes.

`sudo snapper rollback`
Undo a bad update after booting an older snapshot.

`sudo transactional-update dup`
Update Kalpa atomically; applies on reboot.

Prefer clicking? Myrlyn does all of this with a GUI.
