THE TOOLCHAIN

Build once. Ship everywhere.

Open Build Service
Package for openSUSE, Fedora, Debian, Ubuntu and more from one source.

openQA
Automated tests boot real systems before every snapshot ships.

Fresh toolchains
Latest GCC, LLVM, Rust, Go and Python on Tumbleweed.

distrobox
Any distro in a container - perfect on immutable Kalpa or MicroOS.

TARGET ANY FLAVOR

Tumbleweed - develop on the newest

Leap - ship to stable

MicroOS - deploy as containers
