ADMIN CHEAT SHEET

Run it like a pro.

`sudo zypper patch`
Apply only official security and bug fixes.

`zypper lp`
List pending patches before a maintenance window.

`zypper ps -s`
Find services still running old libraries after updates.

`sudo systemctl enable --now cockpit.socket`
Manage the box from your browser on port 9090.

`sudo firewall-cmd --list-all`
Check exactly which ports are open.

`journalctl -p err -b`
Show only errors since the last boot.

`sudo snapper create -d "pre-change"`
Take a manual snapshot before risky work.

`sudo zypper --releasever=<ver> dup`
Upgrade Leap to the next release in place.
